## COMPANY OVERVIEW

AirX Utility Surveyors, Inc. is Southern California's premier full-service Subsurface Utility Engineering (SUE) service provider since 2000. Expanding our expertise to Northern California and backed by skilled engineers, contractors, managers, locators, and potholers, we have over 120 years of trade experience locating and identifying underground utilities. Our services ensure work and cost efficiency and most importantly, safety.

We offer comprehensive packages with services customized to fit your needs. Completing over 5,000 projects, AirX has developed solid relationships with prime contractors, engineering firms, municipalities, cities, counties, airports, and water districts based on reputation and dependability. Choose AirX for your next project.

## CORE COMPETENCIES

- Closed Circuit Television Video (CCTV) Inspections
- Ground Penetrating Radar (GPR)
- Concrete Scanning
- Traffic Control
- Potholing with Hydro & Air Excavation
- Drawing & Installation
- Permit Processing
- Street Surface Repairs
- Project Management
- Report Documentation
- Utility Locating

## PERFORMANCE

100%

2020 - CURRENT

### CCTV SEWER & STORM DRAIN INSPECTIONS

Provide CCTV inspection services to contractors with projects that require Crossbore Standards of horizontal boring.

2020 - CURRENT

### CCTV SEWER & STORM DRAIN INSPECTIONS FOR NOR CAL'S LARGEST UTILITY PROVIDER

Perform pre and post construction inspections of sewer and storm drains utilizing advanced closed circuit television video (CCTV) technology.

2020

### LOCATING & POTHOLING SERVICES

Performed utility locating and potholing services, excavating 29 potholes to establish conflicts and connection points on a variety of utilities for NV5's San Diego office. Utility marking, excavation, material vacuum, and pavement work was successfully performed.

2019

### UNION STATION PROJECT

Consultant to HDR Engineering, Irvine, providing subsurface utility engineering services including utility locating, potholing and trenching services. Properties included Metrolink, Metro Trolley, Burlington Northern Santa Fe, Amtrak Railroads, City of Los Angeles, and Caltrans. Archeologist, flagman, Native American monitors, surveyors, and inspectors from the City of Los Angeles and Caltrans were present.

2013 - CURRENT

### PIPELINE SAFETY ENHANCEMENT PLAN (PSEP)

A 10-year, billion-dollar project to test and/or replace outdated gas lines throughout Southern California.
